Screen Shot of Webinar presented by Ms Garima Bhagat CVO/ESIC on “Preventive Corruption in Public Procurement” 
(Date : 28.10.2020 at 03.30 PM)

1.

DYNAMICS OF CORRUPTION

► Size: Bribes generally related proportionally to size of procurement.
► Mystification: More complex the technology, lesser the risk of being exposed, higher the attractiveness
► Immediacy: As opposed to long drawn contracts with staggered payments, one with large pay-outs in immediate future more attractive- limited term of office of public officials
► Degree of subjectivity involved: Greater the discretion available to procurer, wider the opportunity window
