Sub-station Projects in Ethiopia:

IRCON has completed two Sub-station Projects in Ethiopia with 9 sub-stations and 8 sub-stations with Transformer Bay first one in 2006 and second in 2012. In spite of difficult terrain and adverse condition, IRCON's team completed the project in time. IRCON supplied all the equipments of International standard and executed the work. Under extreme site conditions and facing multiple challenges, the work was carried out by a team of professionals with the highest International Standard.
